

Guidance on Uploads

Photos (mandatory)

When you are choosing photos for upload, please consider the following:

- High quality resolution.
- Photos should have the barrier clearly visible.
- Preferably both photos are taken from the same vantage point.

Look at the examples below.

Dalloz dam (France) before and after removal.

Dam on river Tromsa (Norway) before and after removal.

Video (optional)

When you are preparing a video, please consider the following:

- Focus on a clear message answering the following questions
- Ideally you film at the actual location of the removal: **What was the project about?**
Why should your project win the award?
- You can film with your phone, no need for professional equipment.
- If possible (when you have access to video editing software), include before/process of/after the removal stills or video clips.
- Include credits and logos if necessary.
- Do not exceed 1min.

The video will be used for promotional purposes, presentation of nominees and public vote. A good example to look at is Tyne River Trust video on their Duck pond dam removal, available here: <https://damremoval.eu/dam-removal-award-2-2/>
